

Supermicro Total Solution for Nexenta

Simple, Scalable, High-Availability Storage

Designed for Easy "Out-of-the Box" Deployments

Supermicro introduces Software-Defined Storage solution that is fully tested, validated, and easy to deploy and manage. This brings all the benefits of SDS, including flexibility, scalability, and a lower total cost of ownership. The Supermicro Unified Storage Solution powered by Nexenta, is a purpose-built, small form factor system that delivers enterprise grade, full featured unified file and block storage services.

The Supermicro Unified Storage solution comes in five high-availability configurations including all-flash (2U) and hybrid (4U). These configurations were specifically designed to support your high performance databases, business-critical virtualized environments, generic file servers and near-line archive use case needs.

Unified Storage with Block and File Interfaces

Deploying unified storage avoids creating isolated storage silos, enables greater efficiencies, and is easy to manage via the modern UI. The Supermicro Unified Storage solution supports Fibre Channel and iSCSI for block, and NFS and CIFS/SMB3 for file-based storage.

High-Availability and Data Management

All Supermicro Unified Storage solutions are High-Availability systems with hot swappable components and offer a full suite of enterprise-grade data management software.

Ready to Deploy Configurations

Turn-key system configurations offer predictable and reliable performance, capacity, and density optimized for your applications. Available in all-flash, hybrid, and all-disk configurations.

Backed by Comprehensive Supermicro Program

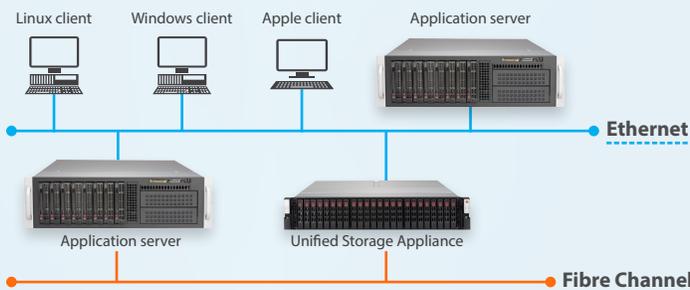

All systems are backed by multiple service and support options from standard to mission-critical enterprise support.

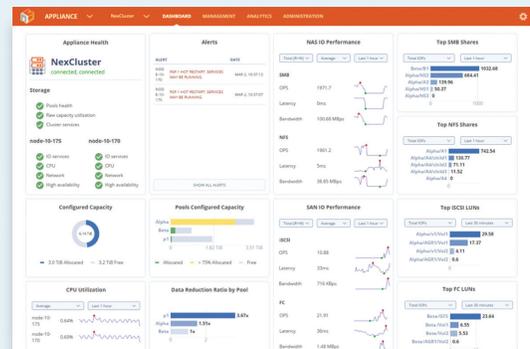

UNIFIED STORAGE AT-A-GLANCE

- Unified Block and File
- All-Flash, Hybrid, and Disk
- High-Availability
- Hot Swap Components
- Optional 16G Fibre Channel
- Inline Data Reduction
- Thin Provisioning
- Snapshots & Replication
- Comprehensive Analytics
- VMware, OpenStack, & Docker Integration

Typical Enterprise Deployment (NFSv3 / NFSv4 / CIFS / SMB3 / iSCSI / 16G FC)

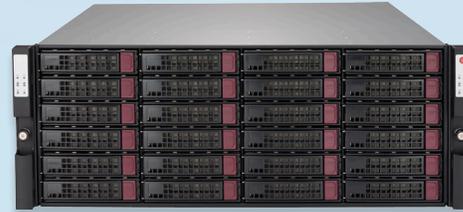

Easy GUI Administration

Hybrid & Rotational Media

All Flash
